Background & Value Proposition

- Brings an outstanding record of leading operational and system initiatives, focused on challenging the status quo to create transformational information technology and business improvements. Known as a problem-solver, highly intuitive and practical, Lambert is a natural leader who believes success is measured in results. His desire is to contribute as a corporate leader that leverages thought leadership, complex problem solving, employee coaching, organizational design, and communications to impact performance results.
- Lambert possesses a passion for change through innovative thinking and team building; consistently searching for a new or better way to accomplish the target goal. He applies his expertise creating a culture of improvement in which others excel.
- An accomplished member of several management teams during his career, Lambert has a depth of experience and knowledge unique in the marketplace. Career experience includes ten years consulting as a senior manager at a Big 4 firm, 12 cumulative years as Vice President/Director of Operations, Information Technology and ePMO at several retail chains and 14 years total consulting on numerous retail, oil and gas, telecom, manufacturing, and distribution clients.
